

NAME: Claire Fletcher
AGE: 24
LOCATION: Loughborough

Claire did DNA last year (2008-2009) at Open Heaven Church in Loughborough. She is passionate about Albania, other cultures and languages, freedom, worship and seeing people encounter God.

"DNA impacted my life in many ways, and I believe I will continue to discover the positive effect it has had on my life for many years to come. It felt like God dug right into my life and re-established some foundations that had previously been in pretty bad condition! A lot of this had to do with the way I thought, my identity, my view of God and my will. God's been

straightening out some unhelpful and destructive ways of thinking and He's started to show me what He's put in me. I couldn't have stepped out into the calling God has on my life without God dealing with some of these fundamental issues first."

Her Online year has a cross-cultural mission theme, with a particular focus on Albania.
